

# Movement Tracking System (MTS)

# Terminal Learning Objective

**ACTION:** Demonstrate basic familiarity with the Movement Tracking System, including its capabilities, functions, and operational concepts.

# MTS Outline

- Historical perspective
- MTS overview
- System capabilities and functions
- Operational concept
- Hardware description
- MTS units and vehicles
- Summary

# Lesson Learned

Inability to track, reroute, and otherwise communicate with TWV leads to:

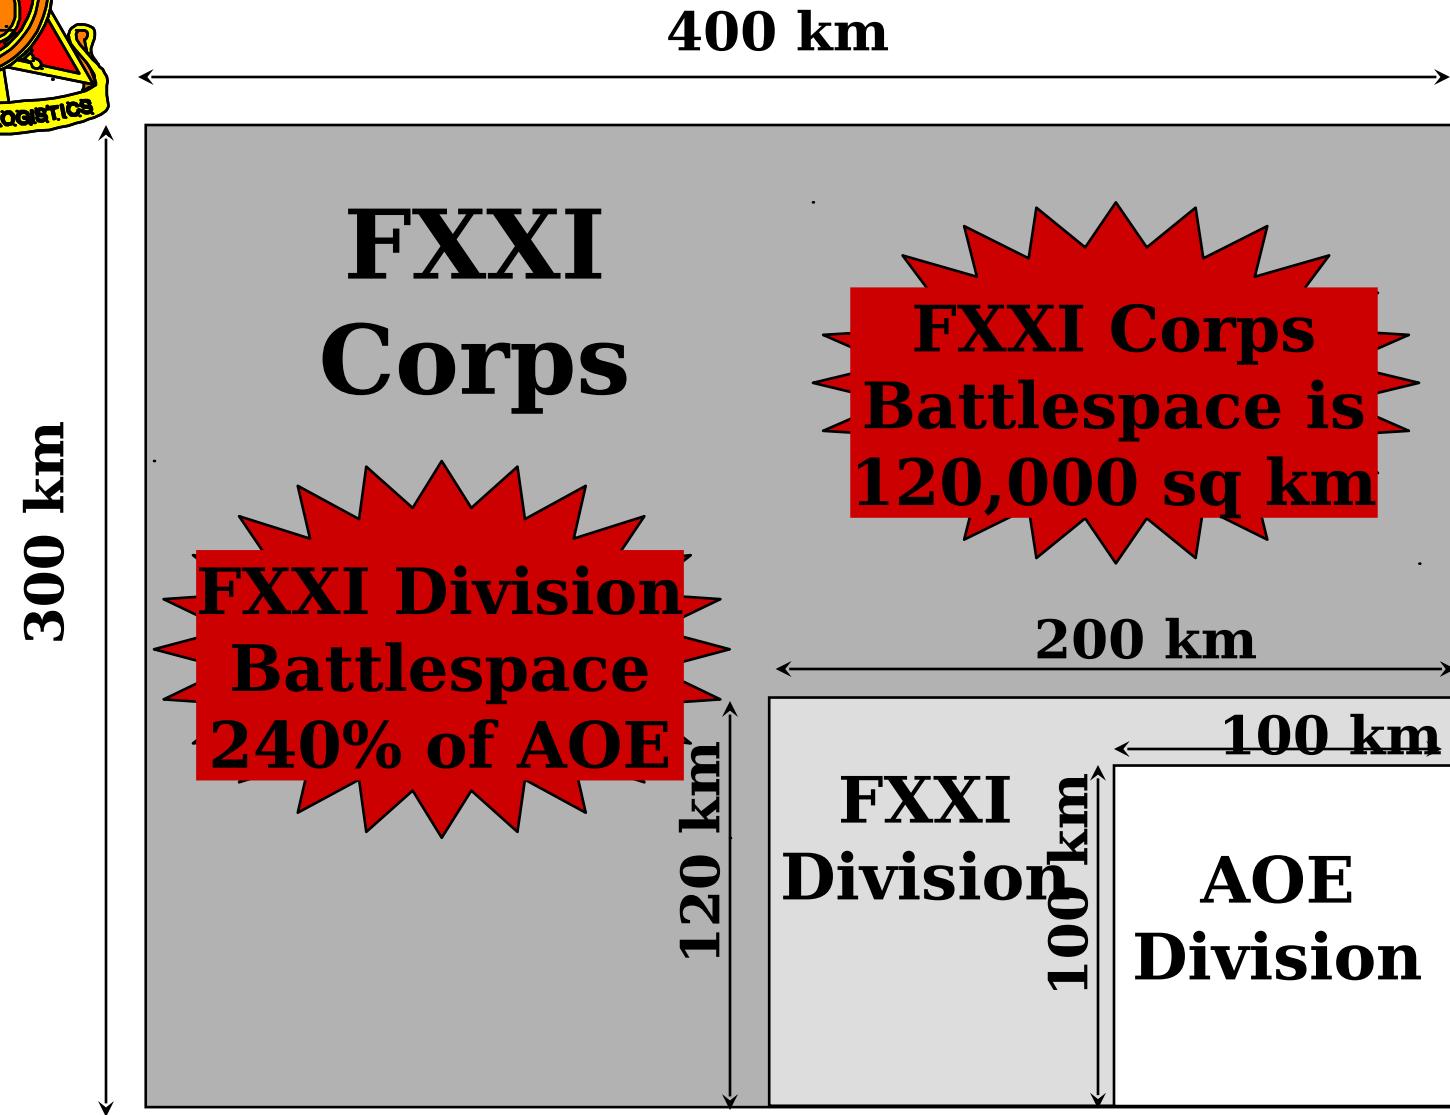

- Inefficient asset utilization
- Increased personnel and equipment risk
- Misdirection of cargo

# Characteristics of Force XXI Operations

- Rapid force projection
- Extended lines of communication (LOC)
- Logistically bare-based areas

# The Expanding Battlefield

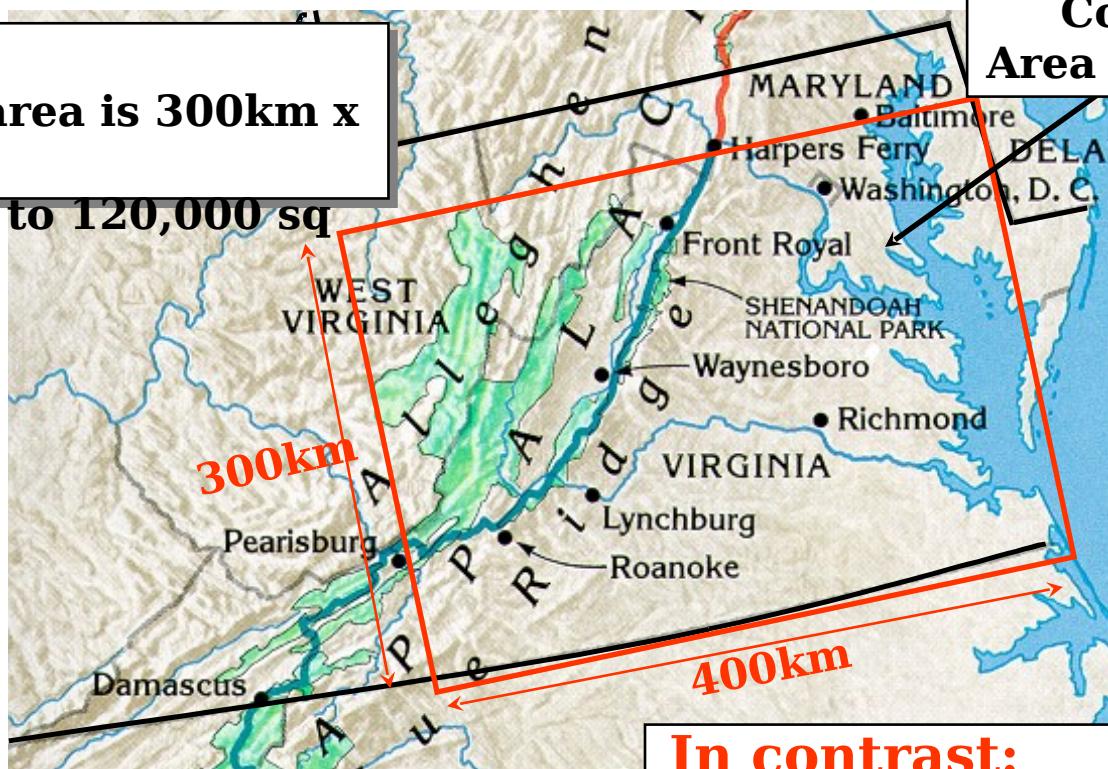

# Covering the Map

**FXXI:**  
Corps XXI's area is 300km x  
400km

This equates to 120,000 sq  
km

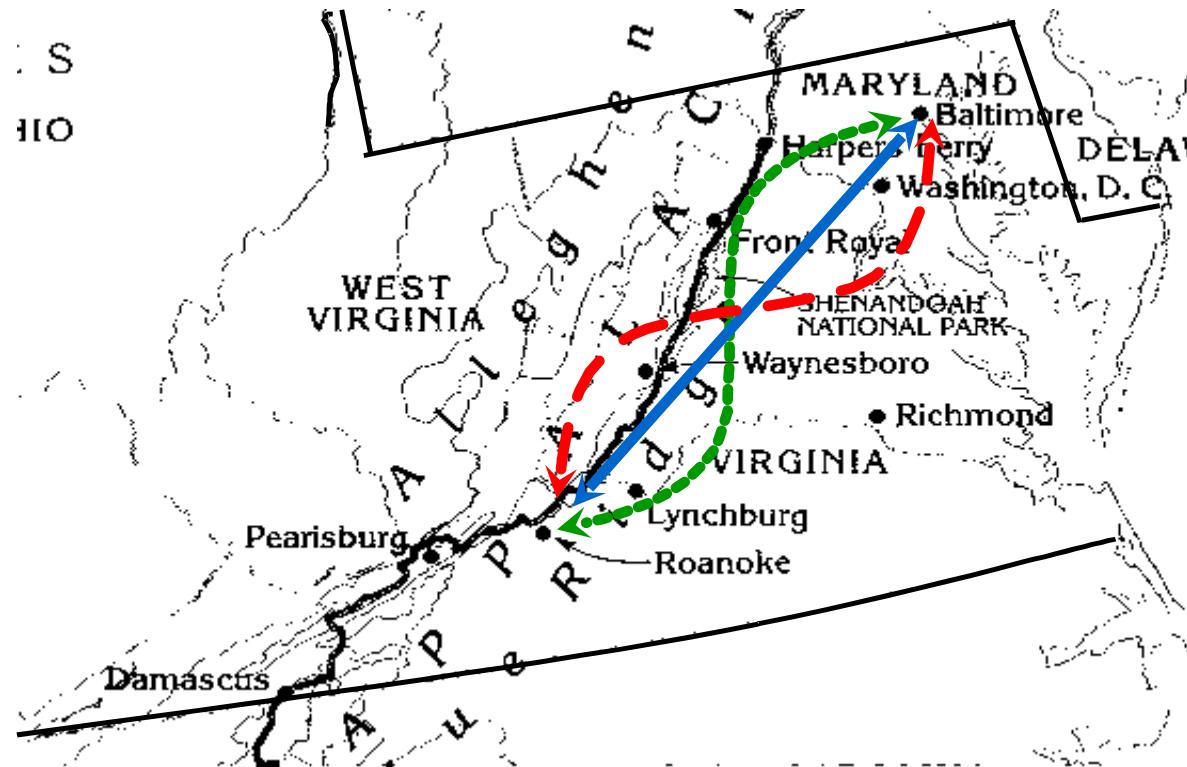

**Corps XXI's  
Area of Operation**

**In contrast:  
Virginia's size is  
only 105,586 sq  
km**

# Illustrative Road Distances

**Distance:**

**Straight Lin** → 370 →

km

**Interstate** ← → 483 ← →  
(40 km/hr) km

12

hrs

**Secondary Rd** → 579 →  
(25 km/hr) km

23

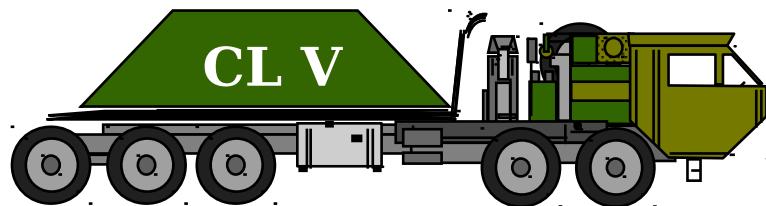

8

hrs

# How do we...?

Go from this ...

Flat tire. Now we will be 30 minutes late. Hope those guys can hold out.

We are under fire! Need help NOW!!! .... Must be out of radio

**Most trucks do not even have radios**

To a system that provides....

## Positive Control

- Force Protection
- Total Asset Visibility & Intransit Visibility

This situation is made worse with the increased battlespace of Force XXI

# MTS Overview

## Requirement

The Army needs a capability to track the location of vehicles, communicate with vehicle operators, and redirect movements based on battlefield requirements.

MTS ORD

14 Sep 98

## Required Capabilities

- Military and civilian GPS
- Two-way messaging
- Landline-independent
- Satellite-based tracking and communication system
- Worldwide coverage
- Capability to interface with STAMIS

## Desired Capabilities

- Enhanced signal security
- Capability to use multiple satellites
- Interface with FBCB2
- Vehicle diagnostics/prognostics

# MTS Mission

Provide CSS Commanders with near real-time transportation asset location, movement data, and situational awareness.

Enable logisticians to redirect supplies, identify/avoid hazards, inform drivers of unit location changes, and improve the efficiency of the distribution system.

# MTS Capabilities

- Military and civilian GPS
- Two-way messaging
- Satellite-based tracking and communication system
- Landline-independent
- World-wide coverage
- Capability to interface with STAMIS

# MTS is a STAMIS

- STAMIS for movement tracking
- Used in:
  - peacetime
  - operations other than war (OOTW)
  - wartime
- Used by:
  - vehicle operators
  - control station operators
  - unit command personnel

# MTS Configurations

**Control Station (in the TAC)**

**Mobile Unit**

**Leased / Host Nation Vehicle**

**“V2” Truck**

# Control Station

	<b>MT 2010 Transceiver</b>
	<b>Laptop Computer</b>
	<b>HP340 portable inkjet printer</b>
	<b>Accessories</b> <ul style="list-style-type: none"><li>• Transit case</li><li>• Port expander</li><li>• Control box</li></ul>

# V1 Hardware

	<b>MT 2010 Transceiver</b>
	<b>HP Jornada 680</b>
	<b>Accessories</b> <ul style="list-style-type: none"><li>• Transit case</li><li>• Cabling</li><li>• PLGR adapter</li></ul>

# Quick and Easy Mounting

Palmtop  
mounted inside  
cab

Velcro for  
fast  
placement  
and removal

Transceiver mounts  
to back or top of cab

Transceiver  
Magnet  
Mount

Adapter is included to  
operate the V1  
equipment from vehicle  
power

**Simple and fast installations in under 10 minutes**

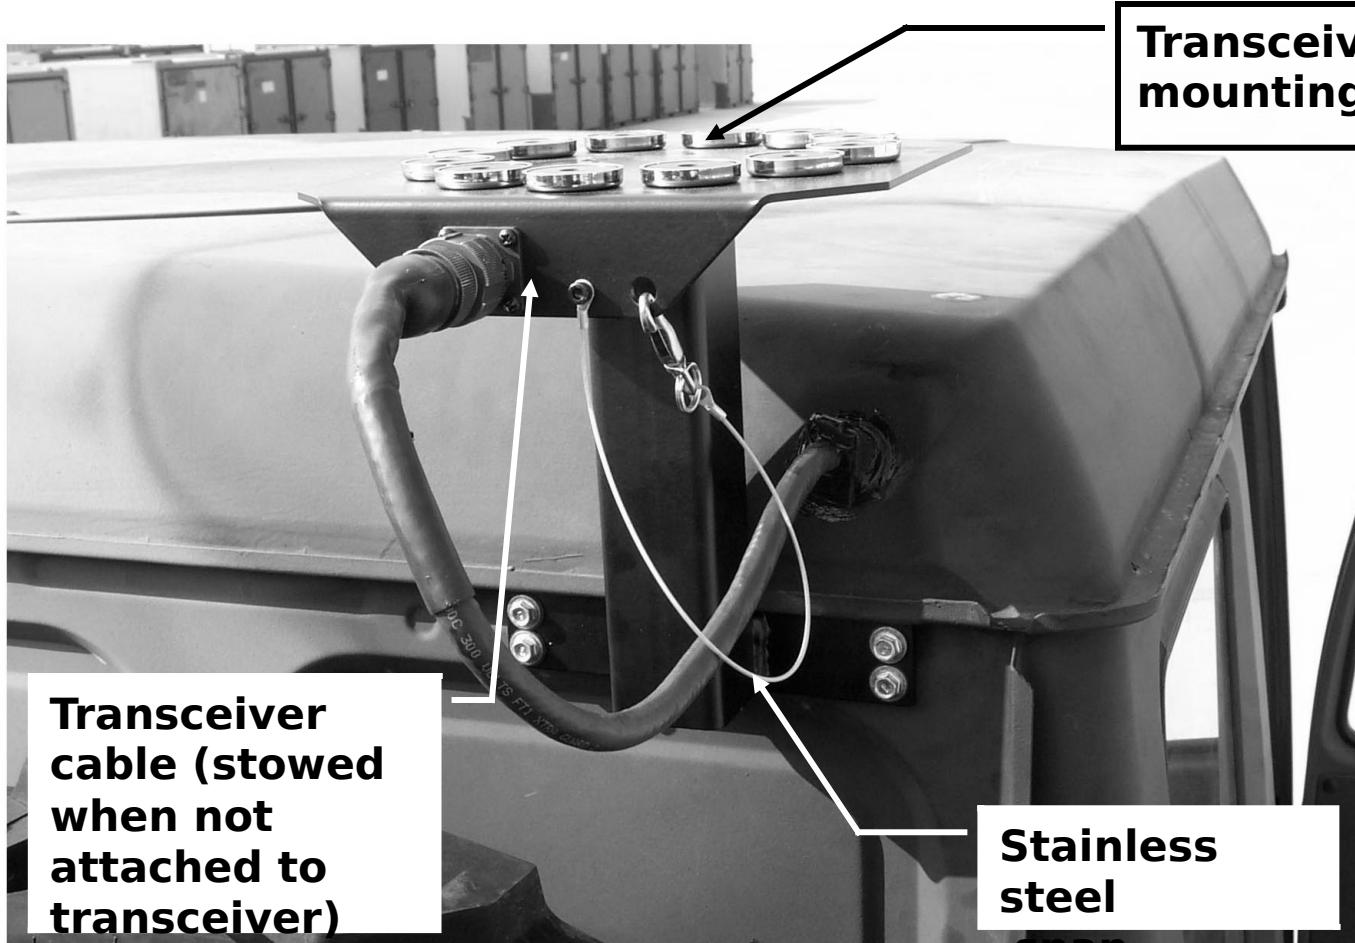

# V2 Hardware

	<b>MT 2010 Transceiver</b>
	<b>HHC-133 Ruggedized Computer</b>
	<b>Accessories</b> <ul style="list-style-type: none"><li>• Transit case</li><li>• Cabling</li><li>• PLGR adapter</li></ul>

# External A-Kit

# In-cab Equipment

**Combined Control and Junction Box  
in HMMWV**

**Separate Control and Junction Boxes  
in FMTV**

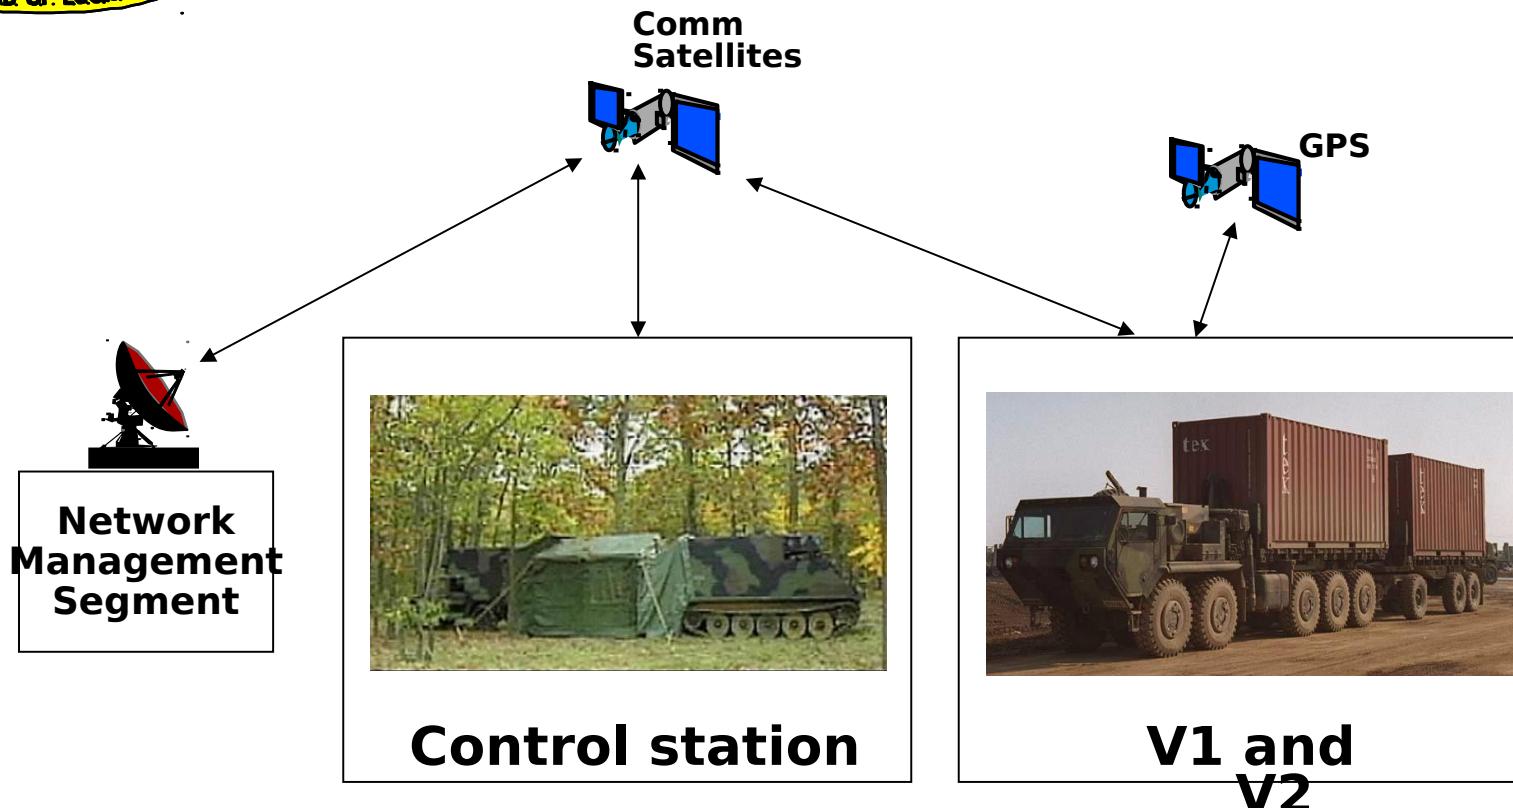

# V2 Keyboard Configuration

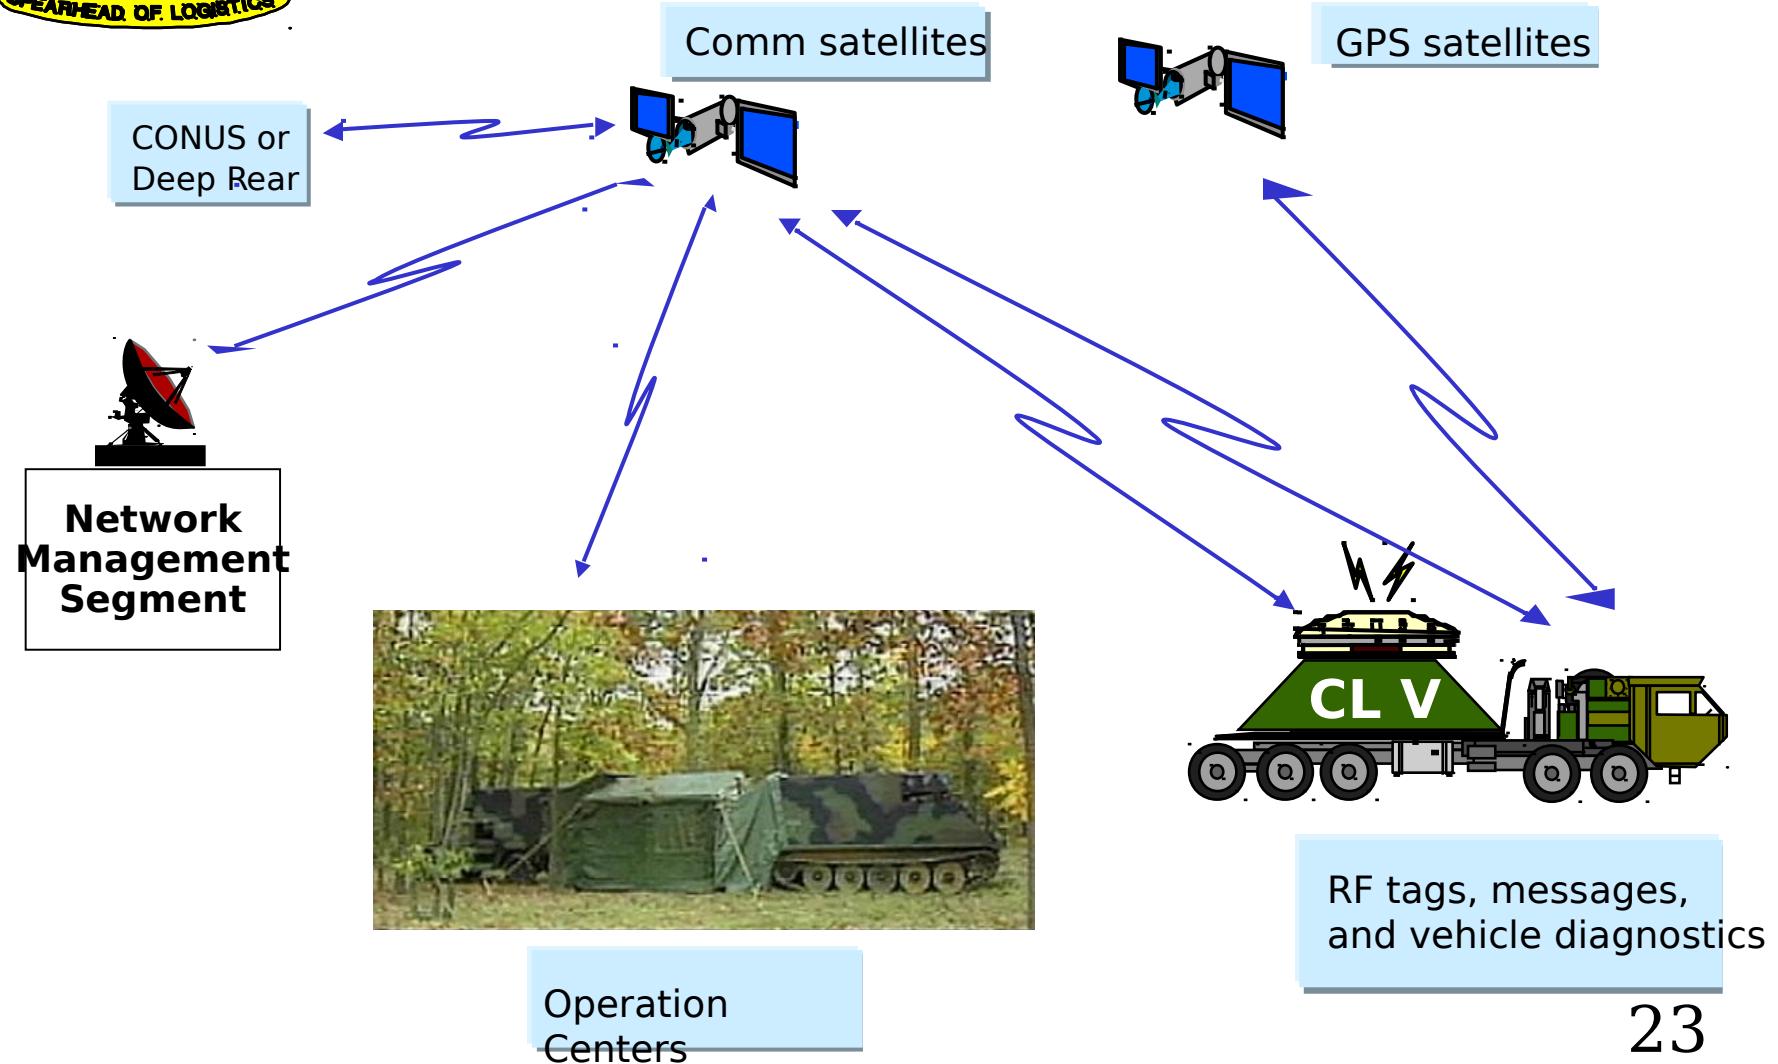

# Communications Network

# GPS Communication Concepts

# Easy-to-use Mapping

Background map with:

- country boundaries,
- major cities,
- major highways

MTS Messenger and TracerLink work simultaneously

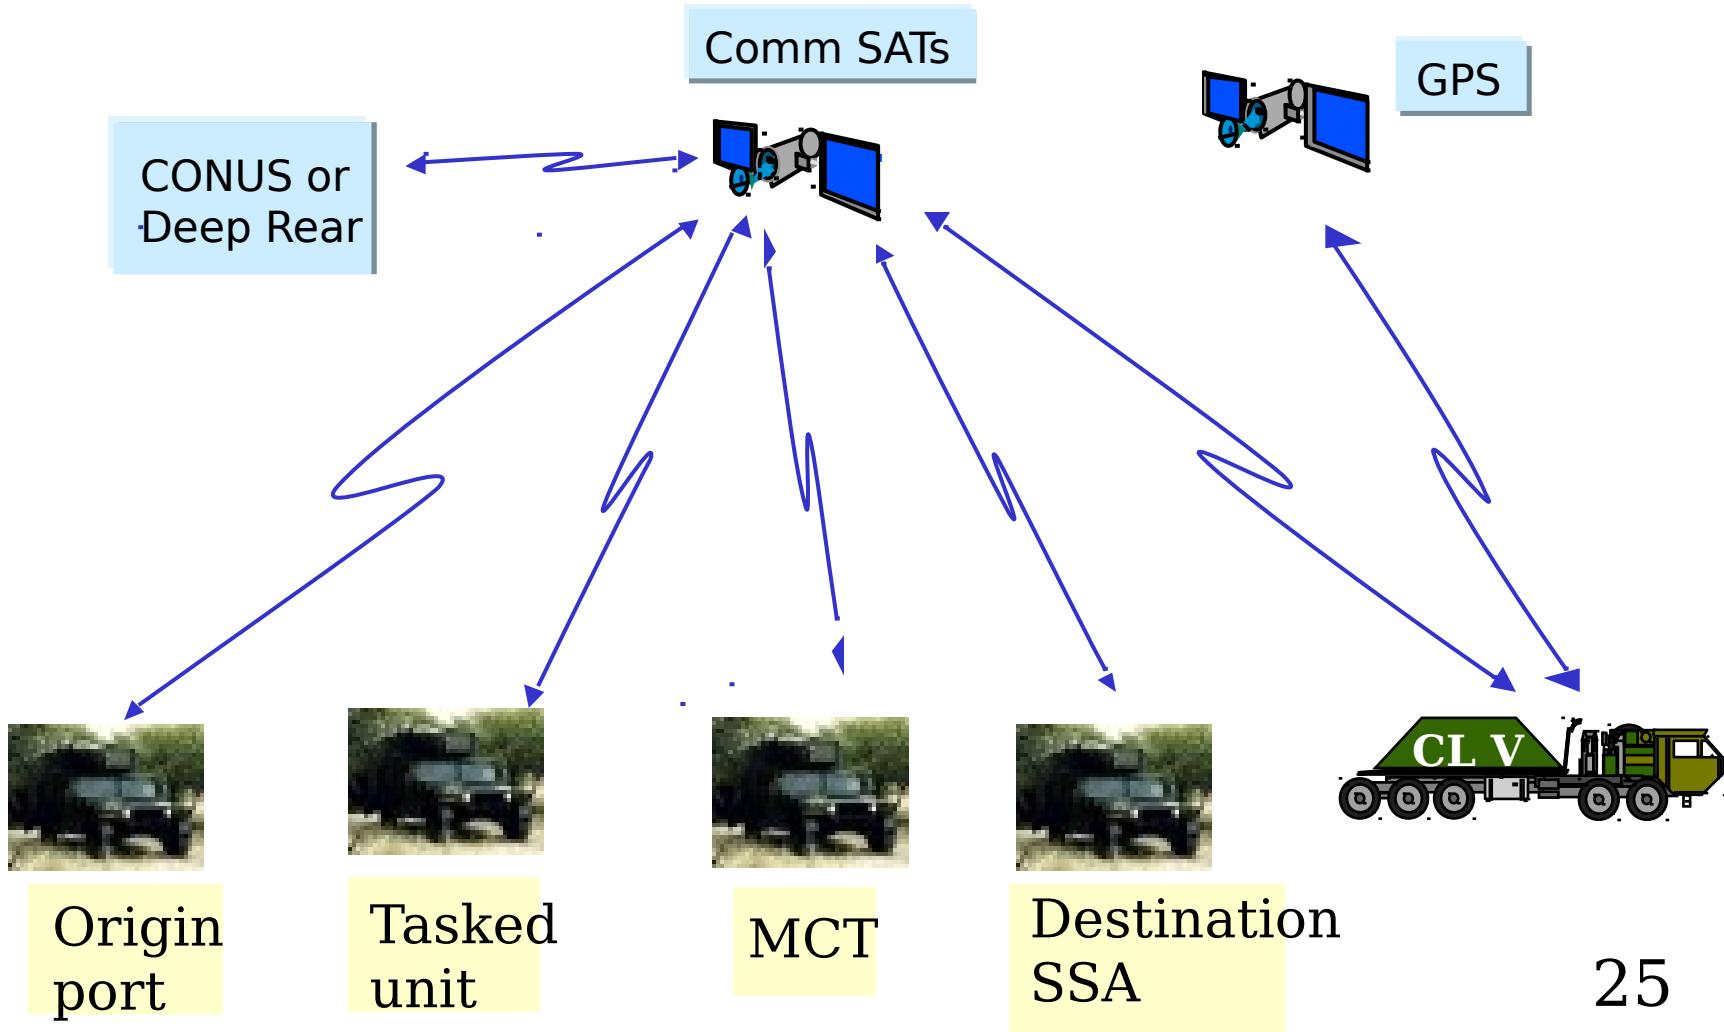

Military grid or Lat Long coordinate

Zoomable, panable, savable

Shape and color of symbol indicate type of unit and status

# Who receives the transmissions?

# Where found?
